R Markdown

This is an R Markdown document

Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

```
print("Hello Ted")
```

```
## [1] "Hello Ted"
```

When you click the **Knit** button a document will be **generated that includes both content** as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

- Try
- Making
- Your
- Own
- Bullet
- List!

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   :  2.00
## 1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##   Mean  :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
##   Max.  :25.0    Max.    :120.00
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
